LEGAL SERVICES

The determination of the need for legal services and the choice of a lawyer are extremely important decisions and should not be based solely upon advertisements or self-proclaimed expertise. This disclosure is required by rule of the Supreme Court of Iowa.

A description or indication of limitation of practice does not mean that any agency or board has certified such lawyer as a specialist or expert in an indicated field of law practice, not does it mean that such lawyer is necessarily any more expert or competent than any other lawyer. All potential clients are urged to make their own independent investigation and evaluation of any lawyer being considered. This notice is required by rule of the Supreme Court of Iowa.

With the complete mailing address you send a personalized greeting to each of them, congratulating them on their upcoming nuptials and offering your services to them. James calls you back a week later asking for more information on what you have to offer. Michael doesn't respond, but that's okay—you've also got his number in the Polk City Directory and will follow up with a phone call.

Even if Michael is not interested in what you have to offer, at least you've established contact, plus you have a hot sales lead in James. The few minutes it took to gather this information with your Polk City Directory will have long-lasting benefits.

Since 1870, there has been one pioneer in the directory industry, the Polk City Directory. The success of the directory is primarily a result of the quality of the information provided within its pages. This information is assembled from a variety of public and private sources, and nearly 50% of the information in each edition is new or updated from the previous year.

We put a lot of effort into compiling this data, yet we realize the best sources of this information are the individuals or businesses who are impacted by the data. As part of the process of updating the information that will go into next year's Polk City Directory, we are assembling self-reported information that will help ensure that next years directory is as complete and accurate as possible. Please take a few moments to fill out and return the attached Change of Address Form if any information in the directory is changing for you.

It is important that you list both your old address information and your new address information in order for us to have a point of reference for making the proposed changes.

If you prefer to fax your updates, please fax this form to: **231-946-6676**

Thank you for your assistance!

Geographic Data Technology (GDT), a wholly owned subsidiary of R. L. Polk & Co., provides the geographic data for the Maps and Street Index Guide in this Polk City Directory.

Geography is constantly changing, and GDT uses a number of resources to keep up with those changes. We maintain relationships with thousands of local and state agencies and private map producers to make sure we have the most current resources available. However, we realize that the best sources of information on any city's streets are often the people who live there and drive those streets on a daily basis. We encourage customer input and feedback on areas where the Polk City Directory maps and street index guide can be improved.

Please use the attached Map Update Form to send along your feedback, be sure to include the publication name on the Polk City Directory cover. In the space provided, describe or sketch the street and address in question, indicating the current and corrected location. If your changes require more space than the form allows, or if you are able to forward an existing map resource of the area, please mail or fax your changes to us.

If you are not able to supply an existing map reference, please be as specific as you can, listing address location and direction (do address numbers run north or south...east or west?) address parity (which side of the street has even addresses and which side has odd?) and proximity to intersecting streets.

Just the FAQ's about the Map Section

Answers to Frequently Asked Questions(FAQ's) about our new Map Section:

Will the street maps cover the entire geography of a directory?

Our goal is to provide street-level coverage for the entire geography of your directory, however there will be some instances where this goal is not met. Issues that will affect the extent of street level coverage include:

- Limitations of the street file database. In some rural areas, streets are not named in the database. Our cartographers will omit these areas from the Map Section.
- Coverage area is too large. We have established a maximum of 48 street-level map pages for a directory. In directories with very large coverage areas, outlying areas may be omitted from the Map Section.

Will features (cemetery, post office, etc.) be inclusive for the area?

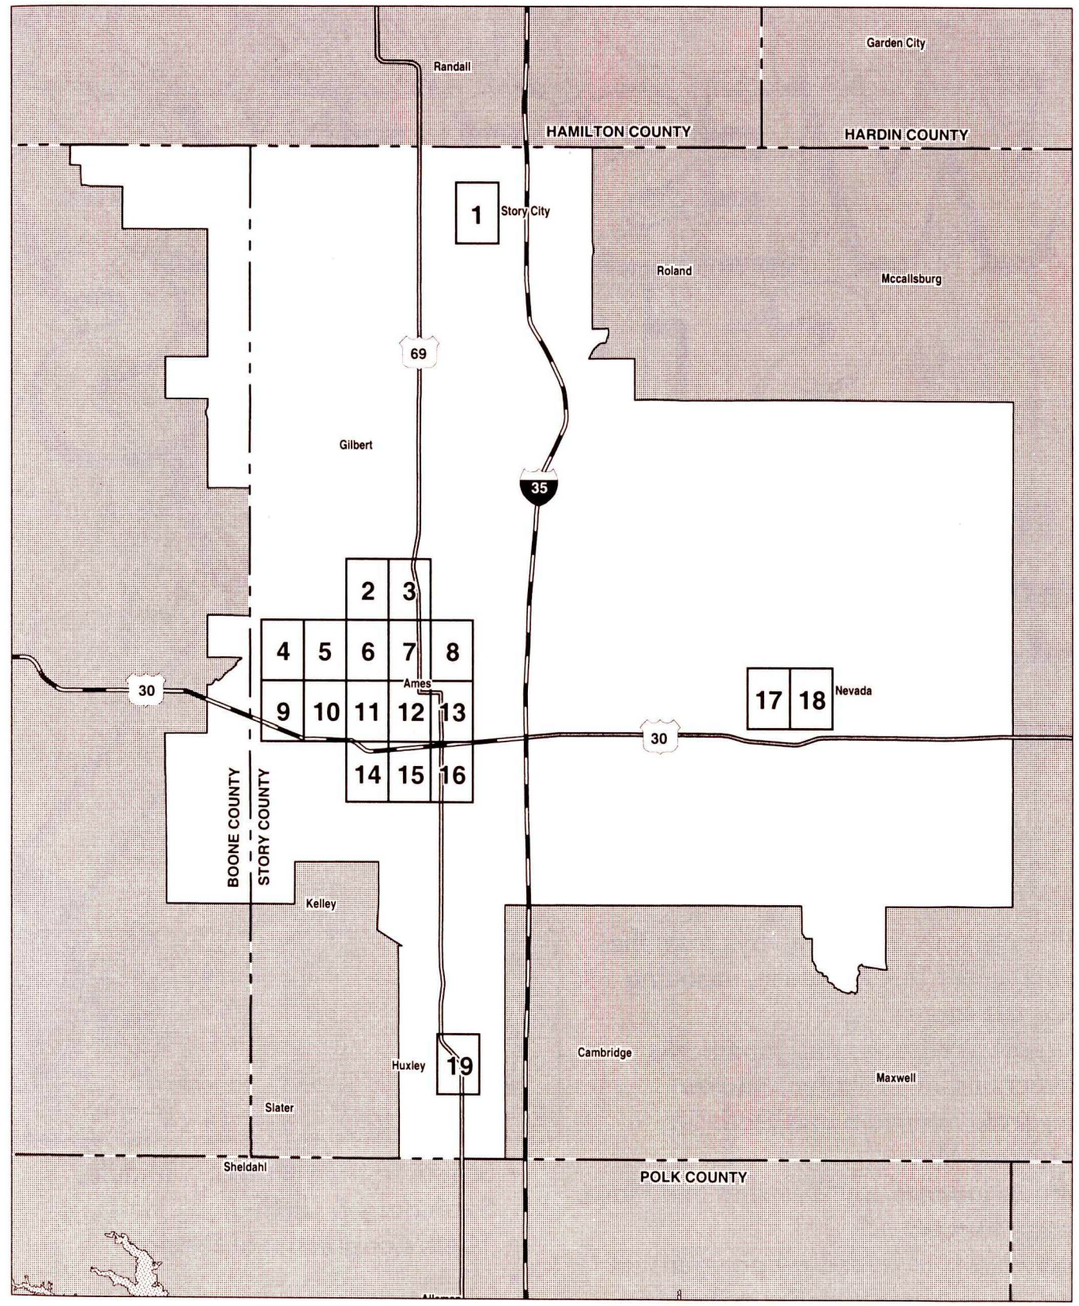
The Map Section will illustrate the following features whenever they are in the mapping database:

- Highway and street, Railroad, U.S., State and County boundary
- Hospital, Cemetery, Government Facility, Post Office, Rail/Subway terminal
- Bus terminal, Retail Center, Golf course/country club, Park, Airport
- Point of Interest (ex. Empire State Building), Water (lake, river, etc.).
- College, Stadium (professional), amusement park, correctional or military facility

Why doesn't a certain street appear on a map?

Geography is constantly changing, and Geographic Data Technology (GDT), our Map Section provider uses a number of resources to keep up with those changes. GDT maintains relationships with more than 5,500 government agencies and private map producers to make sure it has the most current resources available. As part of its quality assurance process, GDT requires at least two sources to include new information in its product. Sometimes the resources GDT uses may not include a particular street, or GDT may not have had appropriate resources to verify the street's existence. GDT realizes that the best sources of information on a city's streets are the people who live there and drive those streets on a daily basis. Because of this, GDT welcomes feedback on areas where its product can be improved. You can use the map feedback card found in your POLK CITY DIRECTORY to provide feedback to GDT on missing streets or areas that need further improvement.

It looks like there's a line indicating a street but it does not include a name. Why is this the case?



GDT may have been able to verify the existence of the street, but not the street name. (For example, the street may have come from a newly approved plat map that did not yet include street names.) GDT has added the street as an unnamed feature. Once the street name has been verified, GDT will include the street name. You can use the map feedback card found in the POLK CITY DIRECTORY to provide feedback to GDT on unnamed streets or areas that need further improvement.

Why should I use the POLK CITY DIRECTORY Map Section rather than another map?

The Map Section is neatly bound inside your POLK CITY DIRECTORY, a reference tool that is already used in thousands of delivery and service vehicles around the country. Used in conjunction with the other sections of our directory, you can not only find your way around town efficiently, but have the wealth of information provided in the POLK CITY DIRECTORY with you as well.

How to use the Demographic Summary for sales prospecting

How can I find my best potential customers?

1. Establish the profile of your best potential customers.

   Individuals over 45 years old who have lived at the same residence for more than 10 years are most likely to buy my products. (Illustration only. You determine profiles based on your needs.)

2. Find out which carrier routes best meet your potential customer profile by searching for these characteristics in the Demographic Overview tables.

			Neighborhood Composition

Just the FAQ's

Answers to Frequently Asked Questions (FAQ's):

How are streets listed in the directory?

The Street Guide lists streets in alphanumeric order with numbered streets appearing first.

Identical street names are listed alphabetically by town name. For example, 200 S Main St in Ann Arbor would appear before 200 S Main St in Chelsea.

Within a city, streets appear alphabetically beginning with the primary street name. For instance, Main St will appear before E Main St which is before N Main St and so on.

How do you list streets that are referred to in more than one way?

We adhere to postal service naming standards, so there will be instances where one side of the street has one name and the other side of the street has a different name.

What is a carrier route?

Carrier routes are one of the ways the postal service identifies a deliverable mail address. They are shown in the directory, whenever available, in the Street Guide.

Are unlisted phone numbers in the directory?

Unlisted phone numbers will not be provided. We respect the right of individuals to not have their phone number published. Furthermore, residents and businesses whose address information is unavailable *will not appear* in the Street Guide.

What if someone's mailing address is different than their physical address?

We standardize each address with U.S. Postal Service standards and list the physical address in the directory. Rural route numbers can be obtained from the carrier route information. Post office boxes are only used when no other physical address is available.

What if I do not want to be listed in the directory?

Polk takes an active role in ensuring the responsible use of consumer information and honors all requests from consumers who do not want to be included in the Polk City Directory. Consumers who do not wish to be listed can fill out and return the change of address form in the back of the directory, checking the box indicating that they do not want to be listed.

Where does the demographic information come from?

All demographic information is obtained from a variety of public and private data sources, including United States census figures. The information is adjusted quarterly based on several economic indicators.
